In the claims:

- 1. (Currently amended) A method for extracting DNA from a biological sample, wherein said biological sample is a hair containing no hair root, comprising contacting the sample with a highly basic solution comprising an effective concentration of a chelating agent, an effective concentration of a stabilizing agent and an effective concentration of a buffering agent.
- 2. (Original) The method according to claim 1, wherein said chelating agent is an alkali metal gluconate salt.
- 3. (Original) The method according to claim 1, wherein said stabilizing agent is an alkali metal silicate salt.
- 4. (Original) The method according to claim 1, wherein said buffering agent is an alkali metal phosphate salt.
- 5. (Original) The method according to claim 1, wherein said chelating agent is sodium gluconate, said stabilizing agent is sodium silicate, and said buffering agent is sodium phosphate.
- 6. (Original) The method according to claim 2, wherein said chelating agent is present in a concentration of about 1-500 mM.
- 7. (Original) The method according to claim 3, wherein said stabilizing agent is present in a concentration of about 1-500 mM.
- 8. (Original) The method according to claim 4, wherein said buffering agent is present in a concentration of about 1-500 mM.
- 9. (Original) The method according to claim 6, wherein said chelating agent is present in a concentration of about 10-50 mM.

- 10. (Original) The method according to claim 7, wherein said stabilizing agent is present in a concentration of about 10-50 mM.
- 11. (Original) The method according to claim 8, wherein said buffering agent is present in a concentration of about 5-200 mM.
- 12. (Original) The method according to claim 5, wherein said sodium gluconate is present in a concentration of about 25 mM, said sodium silicate is present in a concentration of about 25 mM, and said sodium phosphate is present in a concentration of about 75 mM.
  - 13. (Canceled)
- 14. (Currently amended) The method according to claim 13 1, wherein said hair is a human hair.
- 15. (Currently amended) The method according to claim 13 1, wherein said hair is not ground prior to extraction.
  - 16-20. (Canceled)
